PROFESSIONAL SUMMARY

Experienced Full-Stack Software Engineer with 3+ years delivering production systems across enterprise, startup, and contract environments. Skilled in designing and shipping scalable web platforms with Python, Django, React, and TypeScript, and built AI-powered systems leveraging multiple LLMs (OpenAI, LLaMA, DeepSeek), LangChain, RAG pipelines, and vector databases. Delivered solutions for KCB Bank (Oracle Fusion HCM/Financials, 1,000+ staff), Datawise Africa (Lead Engineer on Sheria AI), Digital Appex (Lead Engineer), and Bee MultiScent Ltd. Proven across remote, on-site, and hybrid teams; comfortable with Slack, Jira, GitHub, and SonarQube quality gates; reliable in stakeholder communication, documentation, and end-to-end ownership.

CORE SKILLS

Technical Skills: Python, TypeScript, PostgreSQL, Django, Django REST Framework, Django Channels, FastAPI, Flask, Celery, React.js, Tailwind CSS, Chakra UI, Bootstrap, HTML/CSS, Responsive UI Design

AI / LLM Engineering: OpenAI API, LangChain, RAG pipelines, vector databases (Pinecone), Sentence-Transformers, embeddings & vectorization, semantic search, prompt engineering, AI chatbots

APIs & Integrations: REST APIs, JWT Authentication, WebSockets, M-Pesa STK Push, PayPal, Stripe, KRA iTax, SMS/Email gateways

Databases: PostgreSQL, MongoDB, Redis, Vector DB (Pinecone/Chroma)

DevOps & Cloud: AWS, Fly.io, Supabase, Docker, Kubernetes, Nginx, Gunicorn, GitHub Actions, GitLab CI/CD, production server setup, staging environments, deployment automation

Enterprise Tools: Oracle Fusion HCM/Financials, User Provisioning, Role-Based Access Control (RBAC), Security Policies

Remote Collaboration & Quality: Slack, Jira, Confluence, Zoom, Google Meet, Notion, Git, GitHub, GitLab, SonarQube (code quality gates), PyTest, Vitest, Postman, cURL, Agile/Scrum, code reviews, technical documentation

Work Modes: Remote, on-site, and hybrid — proven delivery across all three

PROFESSIONAL EXPERIENCE

Software Engineer & AI Engineer — Datawise Africa 2026 • Remote

Full-stack development, AI/RAG engineering, and lead on Sheria AI.

- **Lead Engineer on Sheria AI** (sheria.africa) — an AI-powered legal assistant for African law. Designed and shipped the end-to-end RAG pipeline: document ingestion, chunking, embeddings, vector storage in Pinecone, semantic retrieval, and OpenAI-backed answer generation with citations.
- Ongoing contributor to the Datawise Africa (datawiseafrica.com) web platform, working on backend and frontend codebase maintenance, feature enhancements, content management improvements, SEO optimization, and collaborative development within a team environment

- Operate as full-stack Software Engineer (backend + frontend) and AI Engineer across all company projects: Django/DRF and FastAPI services, React/TypeScript frontends, RAG chatbots, vector DB design, embeddings/vectorization workflows, and prompt engineering.
- Set up production servers, configured CI/CD pipelines (GitHub Actions), and provisioned dedicated staging environments for safe pre-release testing.
- Drive code quality through pull-request reviews and SonarQube quality gates; collaborate daily over Slack and track work in Jira under an Agile workflow.

Lead Engineer — Digital Appex2025 – 2026 • Remote

Lead engineer for a Kenyan technology company — full-stack and AI.

- Built the entire Digital Appex platform (digitalappex.co.ke) solo — owning architecture, backend, frontend, deployment, and ongoing maintenance.
- Lead all engineering and AI work across the organization: backend services in Django/DRF, React/TypeScript frontends, AI features, integrations, and production deployments.
- Configured production hosting, SSL, domain routing, automated deployments, and continuous integration; set up staging environments for client review.
- Define engineering standards, write technical documentation, and mentor on best practices in code quality, testing, and security.

Financial Systems Intern — Kenya Commercial Bank (KCB)2025 • On-site, Nairobi

Production support for Oracle Fusion at Kenya's largest bank.

- Provided daily production support for Oracle Fusion HCM and Financials serving 1,000+ staff across the bank.
- Created and managed user roles, access restrictions, and security policies in Oracle Fusion, ensuring compliance with internal controls and audit requirements.
- Designed and exposed secure REST API endpoints on an internal project, integrating Oracle Fusion with internal services and external systems including KRA iTax and payment gateways.
- Resolved tickets, documented procedures, and coordinated with HR, Finance, and IT stakeholders to deliver fixes within SLA.

Full-Stack Developer Intern — Bee MultiScent Ltd2024 – 2025 • Hybrid

Built a full Management Information System used company wide.

- Collaboratively built a full Management Information System (MIS) used across operations, HR, and inventory teams.
- Developed the backend in Django / Django REST Framework and the frontend in React.js with real-time dashboards.
- Implemented 30+ REST API endpoints consumed by the company's React Native mobile app.
- Added role-based access control (RBAC), task assignment, document management, and WebSocket notifications via Django Channels.
- Earned an official recommendation letter for performance and teamwork (available upon request).

Independent Software Engineer (Contract) — Private Clients 2024 - 2025 • Remote

Designed, built, and deployed full-stack platforms end-to-end for paying clients.

- **Collaborative Approach — Referral & Tour Booking Platform** (collaborativeapproach.africa). Full-stack SaaS built with React.js and Django REST Framework. Integrated M-Pesa STK Push, PayPal, and Stripe; built referral tracking, automated commission calculations, JWT authentication, Celery background tasks, and role-based portals (Admin / Agent / Customer).

- **Sheikh Siraj Rahman College — School Management System** (sheikhsirajrahman.ac.ke). Multi-portal system (Admin / Teacher / Student / Parent) on React, Django, and PostgreSQL. Delivered online admissions, fee payments, results publishing, and SMS/email automation; deployed on HostPinnacle with a CI/CD pipeline for long-term maintenance.

EDUCATION

Bachelor of Business Information Technology *2022 – 2025*

Mount Kenya University — Majored in Information Technology, Software Development, and Artificial Intelligence.

CERTIFICATIONS

- **Ultimate Django Series** — Code with Mosh
- **Ultimate Docker Course** — Code with Mosh
- **Ultimate React + TypeScript Course** — Code with Mosh
